

How Agility Unscrambled will Convert Existing databases with Hoopers to Grounders

When Agility Unscrambled 3.1.2.1 opens a database created with 3.1.1.19 – all Hoopers runs will be converted to Grounders.

- The “Class” name will change to GRN on both old and new databases.
- The Run Name will not change, so if it was originally named Hoopers – that will remain Hoopers. If in anticipation of the AU update you set the Run Name for Hoopers – as Grounder 1, Grounders 2 etc. They will remain the same.
- If the runs have already been scored there will be no change to SCT, placements etc
- If runs have not been scored the default SCT presented when scoring starts will be the new Grounders SCT.
